

Environmental product declaration

in accordance with ISO 14025 and EN 15804+A2

Nordanger LVTgulv Klikk

The Norwegian EPD Foundation

Owner of the declaration:

Nordanger Gulv AS

Product:

Nordanger LVTgulv Klikk

Declared unit:

1 m²

This declaration is based on Product Category Rules:

CEN Standard EN 15804:2012+A2:2019 serves as core PCR

IBU PCR Part B: Requirements on the EPD for Floor coverings

Program operator:

The Norwegian EPD Foundation

Declaration number:

NEPD-8633-8305-EN

Registration number:

NEPD-8633-8305-EN

Issue date: 03.01.2025

Valid to: 03.01.2030

EPD software:

LCAno EPD generator ID: 693712

Product

Nordanger LVTgulv Klikk

Program operator:

The Norwegian EPD Foundation
Post Box 5250 Majorstuen, 0303 Oslo, Norway
Phone: +47 977 22 020
web: www.epd-norge.no

Declaration number:

NEPD-8633-8305-EN

This declaration is based on Product Category Rules:

CEN Standard EN 15804:2012+A2:2019 serves as core PCR
IBU PCR Part B: Requirements on the EPD for Floor coverings

Statement of liability:

The owner of the declaration shall be liable for the underlying information and evidence. EPD Norway shall not be liable with respect to manufacturer information, life cycle assessment data and evidences.

Declared unit:

1 m² Nordanger LVTgulv Klikk

Declared unit with option:

A1-A3,A4,A5,C1,C2,C3,C4,D

Functional unit:

Not applicable.

General information on verification of EPD from EPD tools:

Independent verification of data, other environmental information and the declaration according to ISO 14025:2010, § 8.1.3 and § 8.1.4. Verification of each EPD is made according to EPD-Norway's guidelines for verification and approval requiring that tools are i) integrated into the company's environmental management system, ii) the procedures for use of the EPD tool are approved by EPD-Norway, and iii) the process is reviewed annually by an independent third party verifier. See Appendix G of EPD-Norway's General Programme Instructions for further information on EPD tools

Verification of EPD tool:

Independent third party verification of the EPD tool, background data and test-EPD in accordance with EPDNorway's procedures and guidelines for verification and approval of EPD tools.

Third party verifier:

Alexander Borg, Asplan Viak AS

(no signature required)

Owner of the declaration:

Nordanger Gulv AS
Contact person: Morten Aune
Phone: +47 22731000
e-mail: gulv@nordanger.no

Manufacturer:

Nordanger Gulv AS
Professor Birkelands vei 36
1082 Oslo, Norway

Place of production:

Nordanger Gulv
Produksjonsstedet
Jiangsu, China

Management system:

-

Organisation no:

979448759

Issue date:

03.01.2025

Valid to:

03.01.2030

Year of study:

2023

Comparability:

EPD of construction products may not be comparable if they do not comply with EN 15804 and seen in a building context.

Development and verification of EPD:

The declaration is created using EPD tool lca.tools ver EPD2022.03, developed by LCA.no. The EPD tool is integrated in the company's management system, and has been approved by EPD Norway.

Developer of EPD: Pedro Ferreira

Reviewer of company-specific input data and EPD: Børge Heggen
Johansen, Energiråd AS

Approved:

Håkon Hauan
Managing Director of EPD-Norway

Product

Product description:

Nordanger LVTgulv Klikk is available in many beautiful designs. Its wear resistance and durability make it very suitable for commercial use such as shops, offices, restaurants, hotels, nursing homes, rental apartments, etc.

Nordanger Gulv AS introduced LVT (Luxury Vinyl Tiles) to the Norwegian market in 1978, and has since worked hard to offer products that can withstand high loads and at the same time have an aesthetically pleasing appearance. Over the years, we have supplied floors to over 10,000 premises in public environments, such as shops, offices, restaurants and hotels. Our floors are developed to withstand high traffic and high wear while being functional and having a modern design. Nordanger LVT floors are supplied in more than 50 different varieties adapted to the different areas of use.

- All activity in Nordanger Gulv AS has focus on environmental perspectives. Our work environment shall be clean and safe, and all employees must consider environmental consequences throughout their workdays.
- Nordanger Gulv AS assures that all production of flooring apply current environmental legislation, both in the short and the long term. The production must not harm the natural environment, nor threaten people's health, safety or working environment.
- Nordanger Gulv AS informs our customers about our products' environmental qualifications, and can present relevant certifications.
- Our products meet the requirements for achieving BREEAM NOR approval.

Product specification:

Materials	kg	%
Adhesive	0,04	0,36
Limestone	6,92	66,70
Plastic - Polyethylene (LDPE)	0,18	1,69
Plastic - Polyvinyl chloride (PVC)	2,76	26,61
Additives	0,26	2,51
Chemicals	0,22	2,13
Total	10,37	100,00

Packaging	kg	%
Packaging - Recycled cardboard	0,22	100,00
Total incl. packaging	10,59	100,00

Technical data:

Technical information	Method	Result
Type of flooring	EN ISO 16511	Heterogeneous vinyl
Classification of living environment	EN ISO 10874	23
Classification public environment	EN ISO 10874	34
Size of rods (wood patterns)	EN 427	220 x 1210 mm
Tile size (stone/concrete patterns)	EN 427	448 x 906 mm
Total thickness	EN ISO24337	6.5 mm
Thickness of wear layer	EN ISO24340	0.55 mm
Total weight	EN ISO23997	10.37030 kg/m ²
Surface treatment	-	PUR/UV
Fire classification	EN 13501-1	Bfl-s1
TVOC emissions	EN 16516	Approved

Market:

Not applicable.

LCA: Calculation rules

Declared unit:

1 m² Nordanger LVTgulv Klikk

Cut-off criteria:

All major raw materials and all the essential energy is included. The production processes for raw materials and energy flows with very small amounts (less than 1%) are not included. These cut-off criteria do not apply for hazardous materials and substances.

Allocation:

The allocation is made in accordance with the provisions of EN 15804. Incoming energy and water and waste production in-house is allocated equally among all products through mass allocation. Effects of primary production of recycled materials is allocated to the main product in which the material was used. The recycling process and transportation of the material is allocated to this analysis.

Data quality:

Specific data for the product composition are provided by the manufacturer. The data represent the production of the declared product and were collected for EPD development in the year of study. Background data is based on EPDs according to EN 15804 and different LCA databases. The data quality of the raw materials in A1 is presented in the table below.

Materials	Source	Data quality	Year
Additives	ecoinvent 3.6	Database	2019
Adhesive	ecoinvent 3.6	Database	2019
Chemicals	ecoinvent 3.6	Database	2019
Limestone	ecoinvent 3.6	Database	2019
Packaging - Recycled cardboard	Modified ecoinvent 3.6	Database	2019
Plastic - Polyethylene (LDPE)	ecoinvent 3.6	Database	2019
Plastic - Polyvinyl chloride (PVC)	ecoinvent 3.6	Database	2019

System boundaries (X=included, MND=module not declared, MNR=module not relevant)

Product stage			Construction installation stage		Use stage								End of life stage				Beyond the system boundaries
Raw materials	Transport	Manufacturing	Transport	Assembly	Use	Maintenance	Repair	Replacement	Refurbishment	Operational energy use	Operational water use		De-construction demolition	Transport	Waste processing	Disposal	Reuse-Recovery- Recycling-potential
A1	A2	A3	A4	A5	B1	B2	B3	B4	B5	B6	B7		C1	C2	C3	C4	D
X	X	X	X	X	MND	MND	MND	MND	MND	MND	MND		X	X	X	X	X

System boundary:

The product phases include the extraction and production of raw materials and packaging materials (module A1), the transport to the production plant (module A2) and the production of LVT flooring in China (module A3).

Distribution, assembly phase and waste management for the product are included based on the Norwegian market.

Additional technical information:

Not applicable.

LCA: Scenarios and additional technical information

The following information describe the scenarios in the different modules of the EPD.

A4: The LVT flooring is transported from China to Norway by a combination of truck and ship. A standard distance of 150 km is assumed for national distribution.

Modules C and D include the most likely final treatment scenario for mixed construction waste, based on Statistics Norway 2023. It is assumed that 88% of the LVT flooring goes to energy recovery, and 12% to landfill.

Transport from production place to user (A4)	Capacity utilisation (incl. return) %	Distance (km)	Fuel/Energy Consumption	Unit	Value (Liter/tonne)
Ship, Freight, Transoceanic (km)	65,0 %	20509	0,003	l/tkm	61,53
Truck, 16-32 tons, EURO 6 (km)	36,7 %	183	0,043	l/tkm	7,87
Assembly (A5)	Unit	Value			
Waste, packaging, corrugated board box, 100 % recycled, to average treatment (kg)	kg	0,21			
Transport to waste processing (C2)	Capacity utilisation (incl. return) %	Distance (km)	Fuel/Energy Consumption	Unit	Value (Liter/tonne)
Truck, 16-32 tons, EURO 6 (km)	36,7 %	85	0,043	l/tkm	3,66
Waste processing (C3)	Unit	Value			
Waste treatment per kg Plastic, Mixture, municipal incineration with fly ash extraction (kg)	kg	9,12			
Disposal (C4)	Unit	Value			
Waste, plastic, mixture, to landfill (kg)	kg	1,24			
Landfilling of ashes from incineration of Plastics, Mixture (kg)	kg	0,31			
Benefits and loads beyond the system boundaries (D)	Unit	Value			
Substitution of electricity, in Norway (MJ)	MJ	0,012			
Substitution of thermal energy, district heating, in Norway (MJ)	MJ	0,18			
Substitution of electricity, in Norway (MJ)	MJ	14,020			
Substitution of thermal energy, district heating, in Norway (MJ)	MJ	212,12			

LCA: Results

The LCA results are presented below for the declared unit defined on page 2 of the EPD document.

Environmental impact

"Reading example: 9,0 E-03 = 9,0*10⁻³ = 0,009"

*INA Indicator Not Assessed

1. The results of this environmental impact indicator shall be used with care as the uncertainties on these results are high or as there is limited experienced with the indicator
2. This impact category deals mainly with the eventual impact of low dose ionizing radiation on human health of the nuclear fuel cycle. It does not consider effects due to possible nuclear accidents, occupational exposure nor due to radioactive waste disposal in underground facilities. Potential ionizing radiation from the soil, from radon and from some construction materials is also not measured by this indicator.

Indicator	Unit	A1-A3	A4	A5	C1	C2	C3	C4	D
GWPIOBC	kg CO ₂ -eq	1,75E+01	2,36E+00	3,49E-03	0,00E+00	1,47E-01	2,16E+01	1,69E-01	-1,26E+00

GWPI-IOBC: Global warming potential calculated according to the principle of instantaneous oxidation. In order to increase the transparency of biogenic carbon contribution to climate impact, the indicator GWP-IOBC is required as it declares climate impacts calculated according to the principle of instantaneous oxidation. GWP-IOBC is also referred to as GWP-GHG in context to Swedish public procurement legislation.
